

Company profile

In the middle of Schaffhauser Klettgau in the north of Switzerland is the community of Hallau, the largest winegrowing village in German-speaking Switzerland. This is where Armin Klarer founded Klarer Freizeitanlagen AG in 1976.

We plan, develop, produce and distribute leisure systems, predominantly waterslide systems. With the construction of such systems in over 22 countries throughout the world, we have developed into one of the leading suppliers in the much sought-after market of private and public pools, leisure parks and water parks.

As a family company, we employ between 20 and 30 permanent members of staff in planning, administration, production and assembly. After the retirement of Armin Klarer in August 2007, the company has been successfully continued in its proven tradition by his children Claudia Wäckerlin and Stefan Klarer.

With our product brand "system klarer", we have become known for the constant development of new and innovative products and a high level of quality.

New developments by Klarer Freizeitanlagen AG, like our run-out systems, which belong to today's safety standard, heat insulation systems in these times of climate change, unique waterslides like the Magic Eye, the ski-jump slide High Fly or the Looping waterslide, are just a few of the examples of the globally noticed developments of Klarer Freizeitanlagen AG.

After fitting **Europe's largest spa world in Erding** with a huge array of waterslides, the next major challenge of our capabilities was posed with **Europe's largest shopping and leisure centre Bern Brünnen**. Here too, our demand is to offer something special and to comply with the desires and demands of the owners and future operators of Westside – more than a shopping centre.
