

# >>>>> high - fly

Now established, the water High Fly by system klarer sets itself out among waterslide systems throughout the world.

Lift-off is also the theme of this adventure slide.

With a guaranteed soft landing, expert sliders will achieve flight distances of up to 7 m.

From a FreeFall passage, you get to the jump-off platform which is modelled on a High Fly. If you hold your body right, the jump distances can be continually improved. This guarantees that the user will want to have repeated goes and lots of fun. Competition jumps are a daily occurrence.

Safety is provided through a turnstile system, a flexible landing pad and a safety run-out. All systems are checked and released by the TÜV.

The system can also be supplied as a dual jump and is available exclusively from Klarer.

## Technical information

Dimensions:	Starting piste 50 cm, Landing area 200 cm
Capacity:	100 people/hour
Water volume:	5 m <sup>3</sup> /h
Gradient:	40-50%
