

>>>>>>> magic eye<sup>®</sup> slides

New and colossal – a new dimension – developed by system klarer.  
The perfect combination of Tube Slide and Crazy River, with shallow floor and curved sides!

As a family slide and attractive fun slide, which can be used with all conceivable sliding aids.

In single tyres, in pairs or in threes – the possibilities are virtually endless. As a result of the new nut and tongue-faced flange system, the Magic Eye® is also perfectly suited as a body slide.

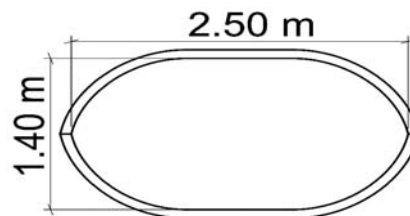

The Magic Eye has a clear dimension of 250cm width with a height of just 140cm. This makes it possible for our planning department to create the tightest loops in the smallest area. It allows the operator to influence the lines of his slide himself.  
Test it out – you won't believe your eyes.
