system klarer

>>>>> super slides

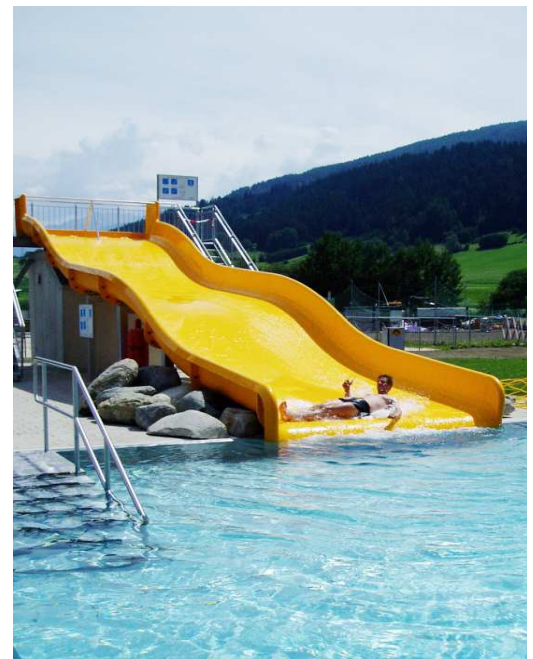

Colourful and joyful, in different widths and all conceivable lengths. Next to one another, behind one another, hand-in-hand or completely on its own. The wide slide by system klarer offers everything that the entire family wants.

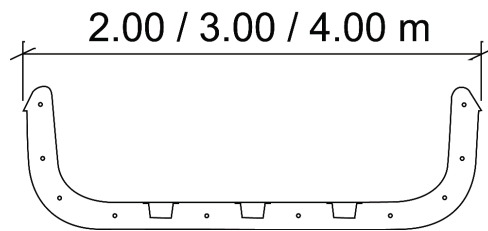

The Super Slide can flow into any pool, include a separate landing pool and be completely or partially encased in a tunnel. It is even feasible to connect the slide to a half-shell or Tube Slide, thus offering a special conclusion to these slides.

High capacities make operators happy, good visibility pleases parents and children. It lets you always know where the little ones are but still provides the desired fun. Our family slide connects all these ideas.
