

body slides varia wild river

This new design of the wild-water river makes individually designed line management possible in accordance with the customer's desires.

The realistic river starts in a starting pool with a water depth of approx. 90cm. From there, the slider goes into an individually designed slide channel with a slight incline of approx. 0.5% and widths of 1.60m to 2.80m. The side walls have various heights of between 0.30m and 1.00m.

In the still pool, you can sit down and recuperate from the eventful journey. The water depth is approx. 90cm and you can indulge in the air jets and other attractions.

Elements such as seating banks, underwater spotlights, air and water jets, steps, height increases and mogul slopes can be installed. There are no limits to the attractiveness of this slide.
