KLARER'S QUALITY PROMISE

When it comes to making the decision to invest in a slide, quality and lasting value are among the most important criteria for our customers in Europe. For this reason, we are dedicated to providing a high standard of quality and a planning service which ensures that your water slides remain an attraction for many years to come. With over four decades of knowledge and experience, we are able to plan water slides that fit even the smallest spaces, as well as to take cost effectiveness into account when it comes to designing target group-specific concepts.

KLARER FREIZEITANLAGEN THE COMPANY

Klarer Freizeitanlagen AG is a traditional family business based in Hallau, northern Switzerland. It is here, surrounded by vineyards in the Klettgau region, that we have been creating water slides and attractions for customers around the world for around forty years.

We have been able to achieve this level of success thanks to our innovative ideas, continuous further development and high standards of quality. From the very beginning, our express aim has been to pass our own joy and enthusiasm for water slides on to our customers and their pool guests.

Our young, dynamic team of motivated employees will support you throughout the entire process – from the initial consultation, to the planning phase, and until installation is complete. What's more, our branches around the world are also available to provide you with advice and support at any time.
